Education

B.S. in Computer Science at the University of California, Davis
Expected graduation 2018, 3.4 GPA

Experience

Founder, Gradfire
Gradfire is the first platform to crowdsource students transcripts for effortless and effective higher-education course selection. Joined the Citris Foundry Accelerator at Haas School of Business, UC Berkeley. Currently, the platform has 4500+ registered students, with more than 45,000 visits.

Site Reliability Engineering Intern, Mailchimp
Responsible for building workflow tools that improved product deployment capabilities for all applications in the Mailchimp ecosystem. Built an IFTT interface that enabled employees to chain together different deployment services conditionally. Contributed to internal Avesta framework.

Software Engineering Intern, Bitglass
Worked on CASB (Cloud Access Security Broker) solution for all custom-developed Salesforce applications. Indentified application footprints to effectively decrypt and encrypt data when saved and written too.

Projects

Rapthatbeat
A search engine for all song instrumentals. Trended on Product Hunt and #1 in PH music.

Ballmetric
Find all video clips of NBA plays broken down by player, shot type and distance.

Dojo
An underground social network that clustered content based on location and interest.

Wolfio
An underground social network that clustered content based on location and interest.

Shapelanguage
1st place overall at Hack Davis. Draw a shape on a touchpad, and it will vocalize it.
